

Cosmetal J-Class IN Under Counter Chillers

Types of water

Chilled and room-temperature water are available on all models together with sparkling water in the ACWG model and hot water in the ACH and CH+ models.

Cu+ Safepath

The application ensures bacterial immunity for the cooler, providing permanent and constant protection against the formation of biofilms.

Optional filtration

Chlorine filters and purifiers can be fitted to improve the taste and odor of the water. An anti-bacterial UV system completes the range of accessories available with the filtering device.

Safety accessories

Accessories such as a water block system, an hydraulic pressure reducer and a water hammer arrestor can be fitted for hydraulic safety.

Available drip trays

A range of trays is available in various materials – stainless steel or steel/plastic – and in various sizes; all of them with optional drainage.

Erogatori suggeriti per l'uso domestico Suggested dispensers for domestic use

Erogatori suggeriti per l'ufficio Suggested dispensers for office use
