

Cosmetal Niagara IN Under Counter Chillers

Performance and efficiency

The ice bank with double coil in the ACWG versions Improves the efficiency of simultaneous chilled and sparkling Water dispensing.

High quality

Standard: water pressure reducer, CO2 regulator for models with sparkling water and the use of AISI 304 stainless steel for the sensitive parts of the casing.

Cu+ Safepath

Available on all models, the application ensures bacterial immunity for the cooler, providing permanent and constant protection against the formation of biofilms.

Optional filtration

Chlorine filters and purifiers can be fitted to improve the taste and aroma of the water. An anti-bacterial UV system, water meter and timer complete the range of accessories available with the filtering device.

Customised dispensing

A wide range of taps and drip trays is available in order to Customise product configuration.

Practicality and flexibility

The cooler can be installed either beneath the bar counter or at a distance from the taps.

Erogatori suggeriti per l'uso domestico Suggested dispensers for domestic use
